An overview of the offices activity:

The office performs the following work in electromechanical specializations:

- ▶ **Design work and preparation of drawings, tables of quantities and technical specifications.**
- ▶ **Conducting feasibility and cost studies for projects.**
- ▶ **Supervising implementation, making abstracts, and approving samples and executive drawings.**
- ▶ **Electromechanical implementation and contracting consultant work for several companies.**
- ▶ **Facilities maintenance work in cooperation with several companies.**

About Us:-

We are an engineering consultancy office in the field of Electro mechanics (MEP) that provides integrated services in the field of engineering consultancy, including design work, feasibility studies, implementation supervision and project management. . Our office provides the highest level of integrated design services and engineering supervision using the highest standards of design and advanced scientific innovations through a specialized team of engineers in different fields, management and study of projects, through the use of design programs and modern engineering analysis methods.

How can we help you?

With expertise in a large number of electrical and mechanical processes, our engineers can advise you on:-

1	Electrical lighting and control systems	11	Final circuit management systems
2	MV and LV power supply and distribution	12	Standby generation and UPS systems
3	Vertical transportation systems	13	Hospital equipment, Furnishing & Designs
4	Communications systems	14	Building Management Systems (BMS) and controls
5	Life safety and security systems	15	Air conditioning and comfort cooling
6	CCTV Systems	16	Specialist ventilation systems
7	Access Control Systems	17	Fire Fighting Systems
8	Sound Systems	18	Plumping systems
9	Kitchens and Laundries Equipment Design	19	Value Engineering and Cost Control
10	Earthing and protection systems		

This Scope of work is applied for Different Projects as follows:

1	Industrial Projects	7	Low Voltage systems and Networks
2	Residential Projects	8	Water Networks
3	Commercial Projects	9	Sewage Networks
4	Resorts and Hotels	10	HVAC Systems
5	Medical Projects	11	B.M.S Systems
6	Cities MEP Networks

Project Progress

The Crescent Development is Almost Complete

A stunning view of the Crescent Development in Abuja, Azerbaijan as construction continues. The prestigious residential complex built on the coast of the Caspian Sea comprises of a luxury 5-star hotel (a luxury shopping mall, residential tower, office tower and underground carpark). Designed by GSA for Oltan Holding, the project is set to be an iconic landmark that will establish the city as a world-class destination.

Concept Design for a 5-Star Hotel in Abuja, Nigeria

Another stunning concept design is completed by GSA for a large 5-star luxury hotel & conference with retail retail Penthouses in Abuja, Nigeria.

Sixty Iconic Tower Begins Foundation Work

Construction has commenced on what will soon be one of the tallest towers in the heart of the New Capital City in Cairo, Egypt. Designed by GSA for Al Boust Mall, the premium 40-storey tower with a built up area of 70,000 sqm, features unique modern architectural design and will comprise of serviced apartments and branded residences, as well as retail and commercial units.

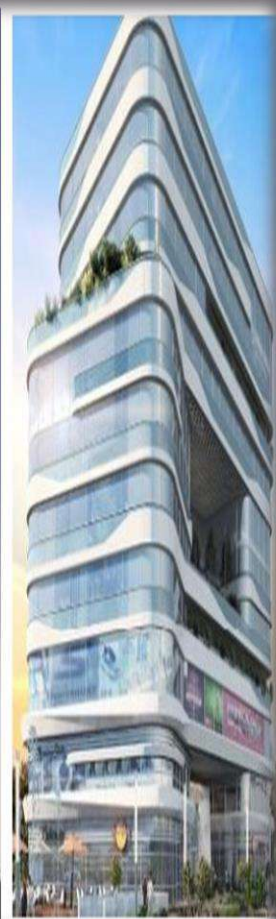

With initial structure and extensive underground testing complete, sixty iconic towers has kicked off construction of the foundation for the anticipated massive establishment. Its construction is expected to wrap up by the end of 2024.
